

## Instructions on DIY Healthy Red Packet

1. Print this document with a colour printer onto white A4 paper and cut out our red packet templates on page 2 and page 3.
2. Use a cutter to carefully cut open along the yellow curved dotted line to make a slit as shown in the diagram on this page below. (Children should only use a cutter under adult's supervision)
3. Fold along the 4 straight white dotted lines. Apply glue to the 2 white rectangular areas and glue the small flaps down.
4. Fold the top flap (the semi-circular flap with the logo of the Department of Health) and you can seal the envelope.
